FEATURES & BENEFITS KEY INGREDIENTS

Improved Alertness and Vigilance:

The use of L-Theanine and caffeine together have a "synergistic" relationship and can lead to improved alertness, cognition, and attention without feeling overly "wired". *

Enhanced Physical Performance: Caffeine's anti-fatigue effects directly impact exercise by improving endurance, physical strength, and power output.

Better Immunity: L-Theanine has been found to help reduce inflammation and be effective in aiding the autoimmune response to pathogens. *

Encourages Skin Health: One of Vitamin B-12's major functions in the human body is to facilitate the production of ATP, cellular energy that's used to—among other things—generate new skin cells. *

Warning: Keep out of reach of children. Not intended for individuals under the age of 18. Consult your healthcare provider prior to use if you are pregnant, attempting to become pregnant, nursing, taking medications, or have any health care concerns. Do not use if safety seal is broken or missing.

Storage: Store in a cool, dry place.

Natural Caffeine

- A central nervous system stimulant that is known for its ability to fight fatigue and increase energy levels by blocking the receptors of a neurotransmitter called adenosine. Which causes other neurotransmitters in your brain that regulate your energy levels to increase. *
- Increases other signaling molecules, such as dopamine and norepinephrine. This change in brain messaging is thought to benefit your mood and brain function.*

L-Theanine

- Has anti-stress effects because it inhibits cortical neuron excitation. Theanine has been found to cross the blood-brain barrier, and when taken orally it can increase brain concentrations of the compound for up to five hours. *
- Studies show that when L-Theanine is combined with caffeine, it may sharpen thinking. *

Vitamin B-12

- Is essential for healthy skin, hair, and nails because of its major part in cell reproduction. Vitamin B-12 boosts skin health by reducing redness, dryness, inflammation. *
- Helps the body create DNA, nourishes the brain and nervous system, and assists with the formation of healthy red blood cells. *
