

IMMUNE STRYPS™ NUTRITION THE NEW WAY

QUICK · CONVENIENT · PRECISE · EFFECTIVE
NO PILLS · NO POWDER · NO WATER

SWYCH STRYPS™ deliver nutrients on an oral dissolvable strip.

SWYCH STRYPS™ are naturally derived, work fast, & quickly dissolve without any sugar, carbohydrates, fillers, or fats. SWYCH STRYPS™ deliver greater absorption with our ZorbMax® nano process. IMMUNE STRYPS™ are naturally derived and support a healthy immune system! They rapidly deliver your body vital nutrients so that you can keep going. Powered by ZorbMax®!

What makes this technology unique is that SWYCH STRYPS™ deliver the active ingredient directly into the bloodstream in a precisely measured dose and bypasses the gastrointestinal tract. The Nano technology reduces the ingredients to a size where they can easily pass through tissue barrier, delivering the active ingredients directly and quickly into the bloodstream, providing rapid results.

ZORBMAX® DELIVERY TECHNOLOGY

SWYCH® is a scientifically-driven technology company. We specialize in the development and production of superior wellness products, utilizing our proprietary ZorbMax® Delivery Technology. Through our commitment to superior quality, we have solved the limited absorption issue of traditional delivery methods for nutraceutical & cosmeceutical products.

Studies show that less than 55% of all supplements ingested orally ever reach the cell. This is why we

have made our products faster acting, delivering superior absorption & helping you perform at your best. At Swych, our nutrition particles are so small, millions of them could fit on the head of a pin. These tiny particles can easily enter your blood stream & deliver the needed nutrition directly into your cells.

For those who demand nothing but the best!
We deliver “MAXIMUM BIOAVAILABILITY”.

HOW TO USE:

Take 1 STRYP daily.

FEATURES & BENEFITS

Boosts Immunity: Helps fight disease-causing free radicals by helping prevent the buildup of free radicals, thus minimizing oxidative stress and damage to your cells. *

Strengthens Against Infections: Alleviate or hinder infections caused by bacteria, viruses, and protozoa by allowing antioxidants to reduce oxidizing agents. *

Improves Cardiovascular Health: Supplementing with vitamin C can help improve heart health by significantly lowering LDL cholesterol and triglycerides. *

Encourages Healing: Zinc plays a critical role in collagen synthesis, immune function, and inflammatory response, it is necessary for proper healing. *

KEY INGREDIENTS

Vitamin C

- Our bodies are constantly under attack by free radical scavengers, which cause damage to our cells and cause disease. Vitamin C acts as an antioxidant to neutralize free radicals and reduce the risk of inflammation and disease. *
- Studies have found Vitamin C not only fights free radicals, but also helps revive other antioxidants like vitamin E. *
- Helps encourage the production of white blood cells known as lymphocytes and phagocytes, which help protect the body against infection. *

Zinc

- A mineral involved in skin repair and in making DNA, the cells' blueprint for replication. Zinc plays a critical role in collagen synthesis, immune function, and inflammatory response, it is necessary for proper healing. *

Warning: Keep out of reach of children. Not intended for individuals under the age of 18. Consult your healthcare provider prior to use if you are pregnant, attempting to become pregnant, nursing, taking medications, or have any health care concerns. Do not use if safety seal is broken or missing.

Storage: Store in a cool, dry place.

For More Information, Contact:

- Can reduce inflammation, decrease the risk of age-related diseases, improve the symptoms of acne, and boost immune functions and health. *
- Immune cells depend on zinc for healthy development and function. This role that zinc plays in immune functioning is why boosting zinc intake when you're sick or just before you get sick may help shorten the duration of illness or help stop you from getting sick.

- Is essential for immune health and disease prevention. In fact, some research suggests vitamin D deficiency could worsen or increase the incidence of certain autoimmune conditions. *
- Regulates many other cellular functions in your body. Its anti-inflammatory, antioxidant and neuroprotective properties support immune health, muscle function and brain cell activity. *

Storage: Store in a cool, dry place.

- Studies show that vitamin D supplementation could be associated with a reduced risk of certain infections.*

- Helps to make various proteins that are needed for blood clotting and the building of bones, which is vital for the maintenance of skeletal and cardiac health as well as in hemostasis. *
- An exciting thing about vitamin K2 is that it's absorbed by your body slowly and stays in your body longer which makes its benefits longer lasting. *
- Should be taken with vitamin D3 as both these vitamins have synergistic effects, inhibiting the osteoclast cells which are responsible for bone resorption. *
