## ZORBMAX® DELIVERY TECHNOLOGY

SWYCH® is a scientifically driven technology company, specializing in the development and production of superior wellness products utilizing our proprietary ZorbMax® Delivery Technology. We have solved the limited absorption issues of traditional delivery methods for nutraceutical & cosmeceutical products. Studies show that less than 55% of all supplements ingested orally never reach the cell.

Our products are faster acting, deliver superior absorption & help you perform at your best. We create nutrition particles that are so small, millions of them could fit on the head of a pin. These tiny particles can easily enter your blood stream & deliver the needed nutrition directly to your cells.

**For those who demand nothing but the best!**  
**We deliver “MAXIMUM BIOAVAILABILITY”.**

**OTHER INGREDIENTS:** Inulin, Citric Acid, ZorbMax®, Natural Flavor, Stevia Extract, Monk Fruit Extract, Natural Color.

Bioperine® is a registered trademark of Sabinsa Corp.

### HOW TO USE:

As a dietary supplement, mix one scoop with 8-12 oz of water. Always discuss your supplements & medications that you take with your health care providers.

## FEATURES & BENEFITS

**More Potassium & Electrolytes:** This hydration formula contains more potassium than common sports drinks to help you avoid symptoms like weakness, fatigue, constipation, sugar cravings, and restlessness before sleep. Support your potassium levels without eating massive amounts of vegetables every day. \*

**Rehydrate Your Cells:** Our zero-sugar electrolyte powder is packed with more potassium chloride for fast hydration, this unique keto hydration electrolytes formula alleviates muscle cramps and supports optimal muscle and nerve function. \*

**Zero Sugar:** Designed to only give your body the substances that support you and your energy levels, all while keeping you in ketosis and supporting normal blood sugars. No added sugars, carbs, or maltodextrin, a complete keto formula. \*

**Enhance Athletic Performance:** Studies show that intake of fluids with a combination of water and electrolytes before, during and after exercise to maintain hydration, replace sweat losses, avert dehydration, prevent risks of medical conditions, and improve recovery time. \*

**Warning:** Keep out of reach of children. Not intended for individuals under the age of 18. Consult your healthcare provider prior to use if you are pregnant, attempting to become pregnant, nursing, taking medications, or have any health care concerns. Do not use if safety seal is broken or missing.

**Storage:** Store in a cool, dry place.

## KEY INGREDIENTS

**Electrolytes:** In terms of nutrition, electrolytes refer to the vital minerals that are generally present in blood, sweat, and urine. These minerals release positive and negative ions which are used for metabolic functions by the body. \*

**Vitamin C:** Our bodies are constantly under attack by free radical scavengers, which cause damage to our cells and cause disease. Vitamin C acts as an antioxidant to neutralize free radicals and reduce the risk of inflammation and disease. \*

**Vitamin B3:** Niacin, also known as vitamin B3, is an important nutrient. In fact, every part of your body needs it to function properly. Studies show it can help lower cholesterol, ease arthritis, and boost brain function. \*

**Vitamin B6:** Vitamin B6 helps chemical reactions in the immune system, helping it work better. Eating foods rich in vitamin B6 will help your body guard against infection. \*

**Folate:** Folate is important for basic cell function in your body. It helps to form the RNA and DNA that tell our cells what to do. \*

**Magnesium:** Magnesium is found throughout your body. In fact, every cell in your body contains this mineral and needs it to function. One of its main roles is to act as a helper molecule in the biochemical reactions continuously performed by enzymes. It's involved in more than 600 reactions in your body. \*

**Zinc:** A mineral involved in skin repair and in making DNA, the cells' blueprint for replication. Zinc plays a critical role in collagen synthesis, immune function, and inflammatory response, it is necessary for proper healing. \*

**Sodium:** An extremely important electrolyte and an essential ion present in the extracellular fluid. One of the health benefits of sodium is the pivotal role it plays in enzyme operations and muscle contraction. It is very important for osmoregulation and fluid maintenance within the human body. \*

**Potassium:** Potassium is an essential mineral that is critical to many body functions, including the delivery of nerve signals, contraction of muscles, regulation of heartbeats and blood pressure, movement of nutrients into cells, and removal of cellular waste. \*

**Choline:** Choline supports several vital bodily functions and may offer a wide range of other health benefits, such as: Improving memory and cognition, and being an essential nutrient for brain development. \*
